

Automation for a Changing World

# Delta Compact Modular Mid-range PLC AS Series

# Flexible, Smart, Friendly - The Best Choice for a Controller of Automated Equipment

## AS Series

The AS Series Compact Modular Mid-range PLC is a high performance multi-purpose controller designed for all kinds of automated equipment. It features Delta's self-developed 32-bit SoC CPUs for enhanced execution speed (40k steps/ms) and supports up to 32 extension modules or up to 1,024 inputs/outputs. The AS series provides accurate positioning control for up to 8 axes via CANopen motion network and 6 axes via pulse control (200 kHz). It is widely used in diverse automated equipment such as electronics manufacturing, labeling, food packaging, and textile machines.

The AS Series Controller is equipped with CANopen and EtherNet/IP network communication for high-speed data transmission. The professional yet simple editing software IPSoft delivers quick hardware and network configuration with built-in function blocks for different industries. It also provides multi-layer password protection for enhanced system security.

The AS Series adopts a rackless design and patented DIN rail clips for fast vertical module installation. The simple shape and dark gray exterior of the AS series help resist stains and dirt in harsh industrial environments.

## High Efficiency Computing

---

- Advanced CPU performance
- Optimized execution efficiency
- Optimized I/O update rate
- Permanent data backup, no battery required

## Accurate Axis Control

---

- Delta CANopen positioning control
- Simple control instructions
- High-speed pulse positioning control
- High-speed counter

## Simple Installation

---

- Easy installation process
- Convenient grounding protection
- Screwless installation procedure
- Loose-proof clip-type terminal block

## Industrial Network Solution

---

- EtherNet/IP solution
- Remote I/O solution
- Serial communication solution

## Programming and Diagnosis Functions

---

- Modular programming structure
- Convenient editing environment
- Easy hardware configuration and parameter setting
- Complete setting tools
- Multiple password protection

## Models and Specifications

---

- CPU
- AS Series I/O modules
- High-density modules and accessories
- Dimensions
- Ordering information

# High Efficiency Computing

Delta's self-developed AS Series CPU provides 32-bit high-performance computing. As the core of a high-efficiency controller, it helps increase productivity and adaptability to demanding equipment.

## Advanced CPU Performance

### ■ High speed execution up to 40k steps/ms

(Condition: 40 % LD instruction / 60% MOV instruction)

- Max. number of inputs/outputs: 1,024
- Program capacity: 128k steps
- Data registers: 60k words
- Max. extension ability: 32 modules

LD instruction 25 ns

MOV instruction 0.15  $\mu$ s

Floating point operation instruction 1.6  $\mu$ s

Trigonometric function instruction 3.5  $\mu$ s

# Optimized Execution Efficiency

## General Scanning Method

Standard simplex scanning which sequentially goes through instructions by fixed schedule operation (e.g. I/O update).

It significantly affects overall execution speed.

## AS Series Scanning Method

Fixed schedule operations will be automatically processed by CPU background program when scanning starts. It significantly enhances execution speed.

# Optimized I/O updates

## Common in the industry: PLC module bus update via serial communication

- General serial communication: the signal is sequentially sent from the 1<sup>st</sup> module to the last module. The more modules the longer I/O update time it takes.

## AS Series: PLC module bus update via parallel communication

- Industrial communication: the signal is sent via parallel communication. The I/O update time is not significantly prolonged even with more modules.

# Permanent data backup, no battery required

## Non-volatile memory material for data backup

	<b>PLC power off</b>
PLC programs	permanent backup
Latched area	permanent backup

## Lithium button battery for Real Time Clock (RTC) function

	<b>PLC power off</b>
RTC	keeps accurate time

# Accurate Axis Control - Positioning Control Solution

## Positioning control - Delta's CANopen Control

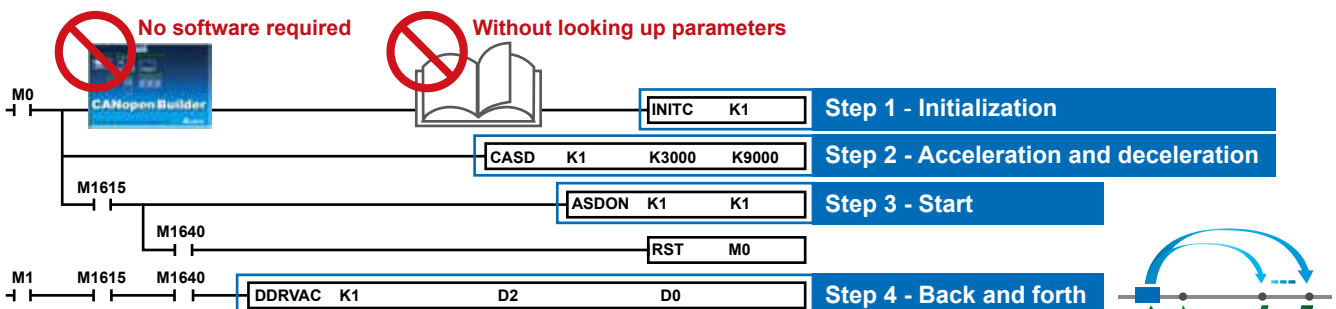

- Delivers up to 8-axis CANopen positioning control with AS-FCOPM communication card
- Fast positioning configuration in one initialization instruction without building CANopen data exchange table
- Batch download programmable servo drive parameters avoids risk of loss
- Axis control by instructions provides easy maintenance and high PLC program readability

## Simple control instructions for AC Servo Drive ASDA-A2 Series

- Initialization: INITC
- Relative positioning: DRVIC
- Read and write parameter: COPRW
- Acceleration and deceleration: CASD
- Constant speed control: PLSVC
- Absolute positioning: DRVAC
- Start / Stop: ASDON
- Homing: ZRNC

### ASDA-A2 back and forth motion control in 4 steps

Pulse 

Motion control of max. 6  
Delta AC Servo Drives ASDA-B2 Series

## ■ Positioning control - high-speed pulse

- AS332T-A / AS332P-A transistor CPU: 6 axes (or 12 channels) 200 kHz
- AS324MT-A differential CPU: 2 axes 4 MHz + 4 axes 200 kHz
- Supports positioning planning table for fast positioning planning and path simulation
- Choose any given 2 axes for linear and arc interpolation

AC Servo Drive  
ASDA-B2 Series

## ■ High-speed counter

- Real-time high precision monitoring:  
AS332T-A / AS332P-A transistor CPU: 6 channels 200 kHz  
AS324MT-A differential CPU: 2 channels 4 MHz / 4 channels 200 kHz
- Up to 16 external input interrupts
- High-speed counter setting tools

# Simple Installation

## ■ Easy installation design

- Space-saving design suitable for installation in control panels

## ■ Rackless Din-rail installation

- Delta patented design

### ▶ Robust slot and clip interlocking design

## ■ Fast disassembly

- Release the clip ring to easily take out the module from the front without moving adjacent modules

## ■ Simple installation process

- Press the clip rings and push the module to the desired position until hearing a "click" to finish installation

## ■ Convenient grounding protection

- Install on Din-rail: CPU module and expansion modules can be installed directly on Din-rail without backplane
- Install with screw: pull out the installation clip ring and directly install it on the panel
- Both methods are equipped with ground protection

## ■ Screwless and time-saving installation

## ■ Robust Loose-proof spring clamp terminal block

- In commonly used spring clamp terminal blocks, the clamping force is determined by the spring material, which decreases with the aging of the spring.

The green arrow is the clamping force, and the red arrow is the pull-out force.

- The AS Series adopts the full-covered spring clamp design that enhances the clamping force. When the wire is pulled-out (red arrow) and the spring moves up (green arrow), a downward force is generated (blue arrow) to clamp the wire.

# Industrial Network Solution

## EtherNet/IP Solution

The open industrial Ethernet communication protocol for real-time control and data collection

### EtherNet/IP<sup>®</sup>

- Max. connectable slave stations: 32
- Max. data transmission: 500 bytes/connection
- Performance: slave station data update in 1 scan time

### Flexible network system configuration

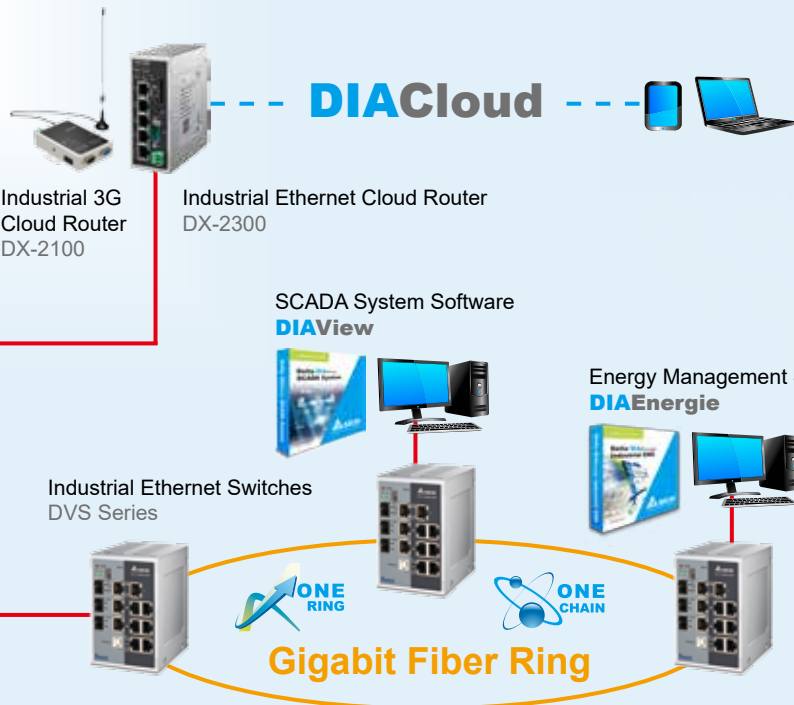

- Supports star, linear network topology for fast expansion and management on production lines
- Compatible with IT network. No independent network or IT technician required
- Combines with Delta IES solution to construct IoT for more automation applications and industrial 4.0 upgrades

### One cable, one network

- Complete Delta EtherNet/IP solution connects different equipment via Ethernet cable and simplify cable preparation
- Replaces traditional 3-layer industrial network structure with seamless connection via 100MB high-speed network
- Complete industrial network diagnosis for shortened debug time

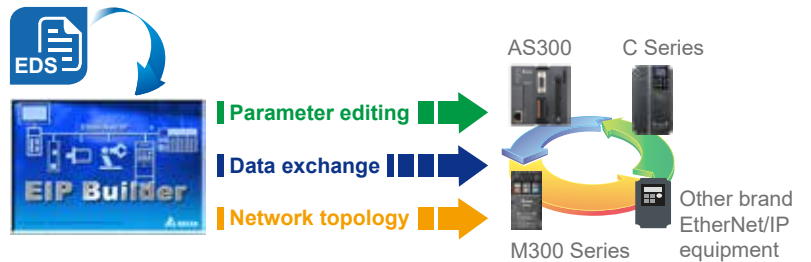

### IoT & Industrial Ethernet

- DIACloud platform connection
- Redundancy ring recovery time < 20 ms
- Industrial class EMC testing

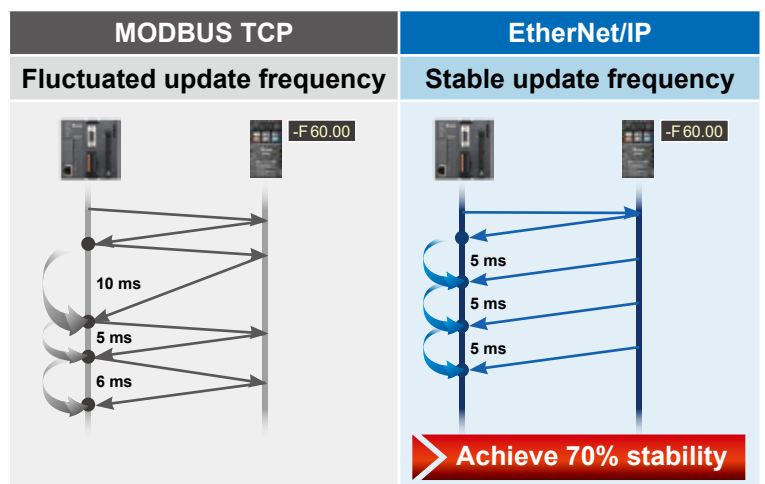

### Software integration

- Consistent data exchange interface shortens learning time with fast system configuration
- Provides Delta equipment parameter list for quick parameter matching without looking into detailed manual
- EDS File provides quick connection with EtherNet/IP products of other brands

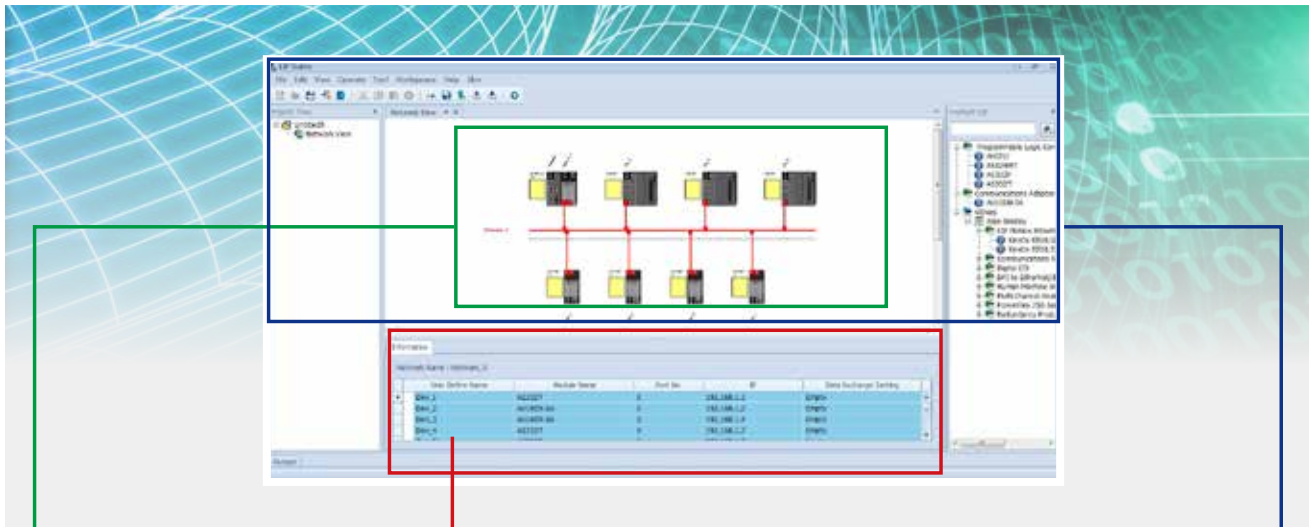

### Accurate data update

- Provides real-time cyclic and acyclic data transmission and define data priority between equipment
- Establishes multiple CIP links and define different register priority with one piece of equipment
- Executes data update based on user RPI. Updates all slave station data in one scan time
- 70% better stability compared with traditional MODBUS TCP

# EtherNet/IP Software EIP Builder

## Visualized Network Mapping

- Direct network planning

## Network Mapping Diagnosis

- Real-time network status and device indicators display

## Parameter List

- Built-in parameter list of Delta's products

## Data Exchange Table

- Data exchange via table blanks filling. PLC programming is not required

## Data Input/Output Corresponding Table

- Preset data exchange on corresponding parameters
- Connecting equipment editing on corresponding parameters

## Data Exchange Diagnosis

- Data exchange status and error codes

## Visualized Product List

- Visualized equipment selection

## IP Management Function

- Configure all IP address of all EtherNet/IP products

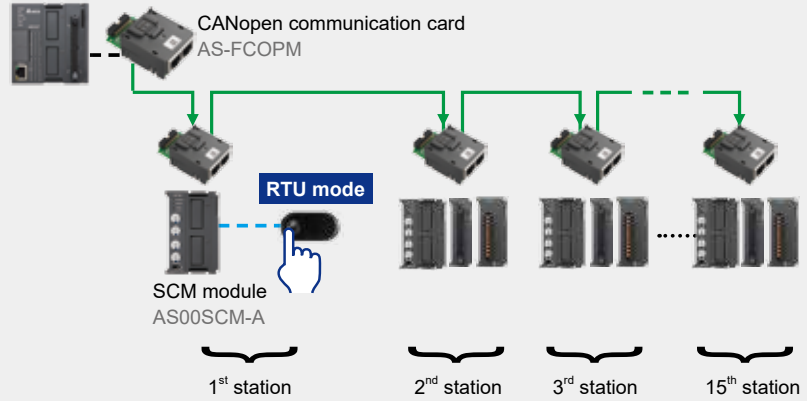

## Equipment Description Management Function

# Remote I/O Solution

## CANopen Remote I/O

- Max quantity of RIO stations: 15 stations
- Max quantity of IO modules (CPU right side + RIO (SCM) right side): 32 modules
  - Max DIO points: 1,024 points
  - Max quantity of AIO modules: 16 modules
  - Max quantity of communication modules: 4 modules (Only installed on CPU right side)
  - Max quantity of IO modules installed on RIO (SCM) right side: 8 modules
- AS-FCOPM can only be installed in slot 2 of the CPU and SCM
- When a CPU is installed as AS-FCOPM in slot 2, then slot 1 can be used to install another function card except AS-FCOPM
- When SCM is working in RIO (RTU) mode, then slot 1 is disabled

### Hardware Configuration

- Hardware parameter complete planning

### Visualized I/O Structure

- Direct I/O planning

### I/O Product List

- Product description and specification

### I/O Without Planning

- Auto-mapping with I/O addresses in CPU (X, Y, and D)

# Serial Communication Solution

## ■ MODBUS Mode

- Easy data exchange configuration

## Real-time history log diagnosis

- AS00SCM stores 2k bytes history log. SCMSOft directly displays the log for real-time communication status monitoring with no additional monitoring software required

## UD Link Mode (User-defined)

- Easy connection to end equipment of special communication protocols

### Traditional programming structure

Instruction receiving, accessing, editing, transmitting, sequence control

### Connection to end equipment of special communication protocols

- Editing the transmitting/receiving packets via SCMSOft. Format exchange and checksum calculation via AS00SCM
- Packet content auto-combination for logic control in PLC, reducing PLC program complexity
- Max. 1,000 transmitting/receiving packets

Packet No.	RX Packet Name
1	RX Packet1
2	RX Packet2
3	RX Packet3

Packet No.	TX Packet Name
1	TX Packet1
2	TX Packet2
3	TX Packet3

No.	Class	Format	Segment View
1	Message Constant	ASCII	"abcd"
2	Address Variable	Null	(R/D Register [4], 4)
3	Message Constant	ASCII	"efgh"

### Instruction execution sequence planning

Command No.	Command Type	Send Packet	Recv Packet	Success	Fail	Retry	Repeat	Send Wait
1	Send & Receive	TX Packet1	RX Packet1	Goto : 1	Goto : 1	0	2	0
2	Send & Receive	TX Packet2	RX Packet2	Goto : 2	Goto : 1	0	3	0
3	Send & Receive	TX Packet21	RX Packet3	Goto : 3	Goto : 1	0	4	0
4	Send & Receive	TX Packet25	RX Packet4	Goto : 4	Goto : 1	0	5	0
5	Send & Receive	TX Packet28	RX Packet5	Goto : 5	Goto : 1	0	6	0

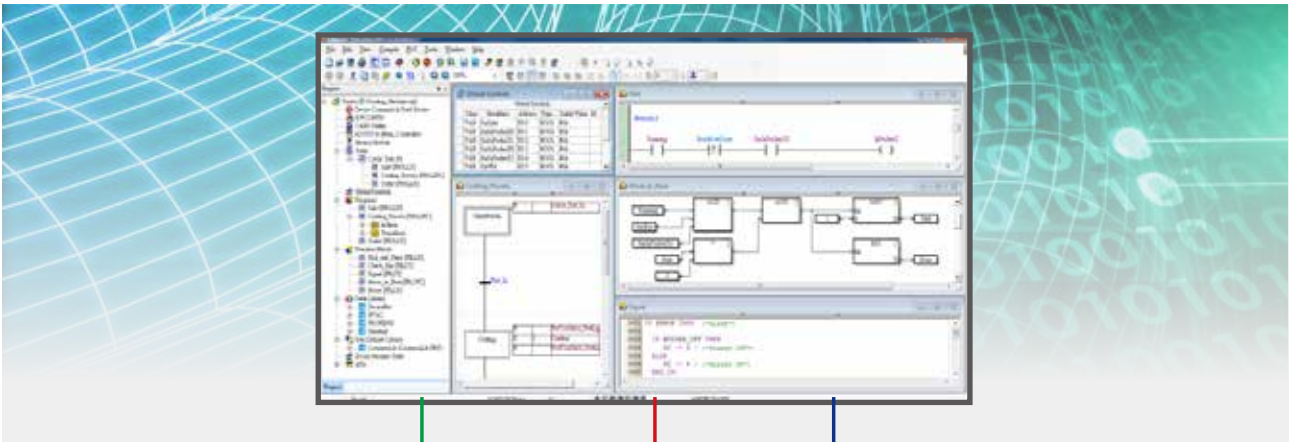

### User-defined communication format editing

# Programming and Diagnosis Functions

## ISPSoft IEC Programming Software

Easy operation greatly enhances efficiency

### Data Tracer / Logger

- Data log and time-sequential analysis

### Positioning Planning Tool

- Table-structured position planning

### CARD Utility

- Data backup tool

### COMMGR

- Communication interface manager

### HWCONFIG

- Hardware configuration and parameter setting

### EIP Builder

- EtherNet/IP network configuration

### CANopen Builder

- CANopen network configuration

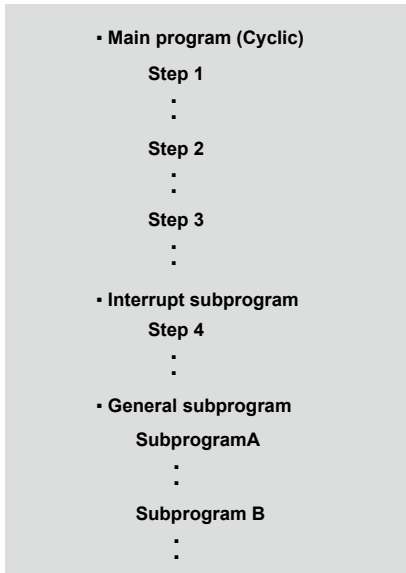

# Modular Program Structure

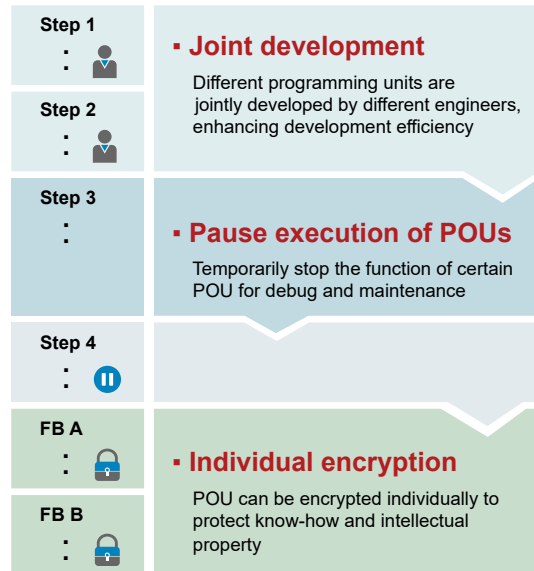

## Traditional program structure

Errors are often found in large-scale programs under a traditional structure. It's hard to debug with increased maintenance cost.

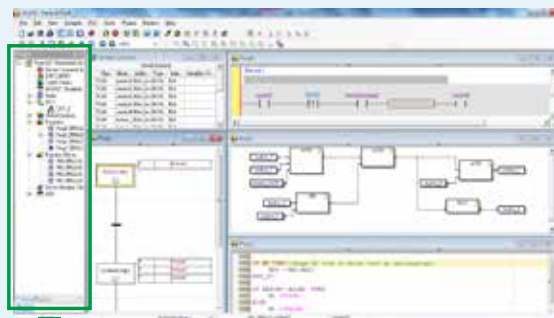

## Modular program structure

Programming organization unit (POU) enables easy management in large-scale programs with high development efficiency.

## Modular Program Structure

Display panel of task manager

### Task manager

Plan the execution sequence of POUs and define the nature of the tasks (cyclical or interruptive)

### POU management

Manage all POUs via project tree and support POU import/export for joint development or other uses

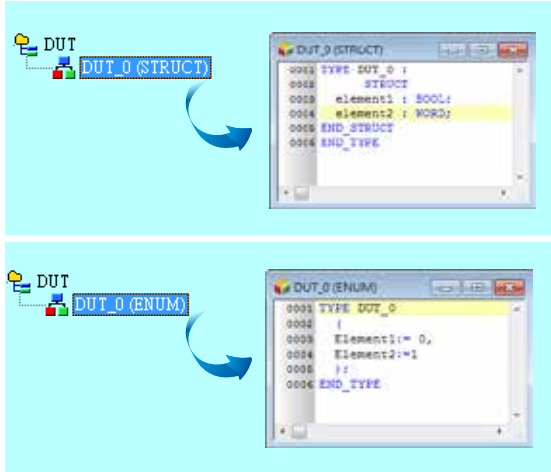

### User library

Built-in variety of Delta developed FBs. Users can add frequently used FBs to the library for future use.

# Convenient Programming

- **User-defined data type**

In addition to basic data types, users can define structures and enumerations for flexible programming

- **On-line programming / update**

Supports program editing in monitoring mode and program updates during equipment operation for convenient debugging and maintenance

- **Debugging mode**

Supports breakpoints, single step execution and other functions to enhance debugging efficiency

# Various Programming Languages

- **Support multiple programming languages in the same project**

- **Ladder Diagram (LD)**

ISPSOft provides a programming interface with the widely used LD language for faster programming

- **Structured Text (ST)**

Similar programming method to advanced programming language C or PASCAL. ST provides more convenient editing for complicated expression

```

0001 // Calculate the third base of
0002 IF ( Base1 and (Base2) > 1000
0003 BaseOut := BaseOut + 1 ;
0004 END_IF
0005 END
0006 // Base := Base + 1 ;
0007 END_IF ;
0008 END_IF ;
0009

```

- **Continuous Function Chart (CFC)**

CFC provides more advanced applications than FBD. It supports data feedback, direct display of data stream and execution sequence for motion control and sequence-centered application

Note: ISPSOft V3.01 supports CFC language

- **Sequential Function Chart (SFC)**

Direct and easy expression for the steps in flow charts for applications that require process control

# Easy Hardware Configuration and Parameter Setting

## HWCONFIG

- **Graphic panel for module configuration**  
Easy configuration based on connecting equipment scanning for quick setup

- **I/O listing**  
Direct display for corresponding device addresses after configuration

Note: Fill the table to configure module parameters quickly.  
From/To instruction is not required for module initialization.

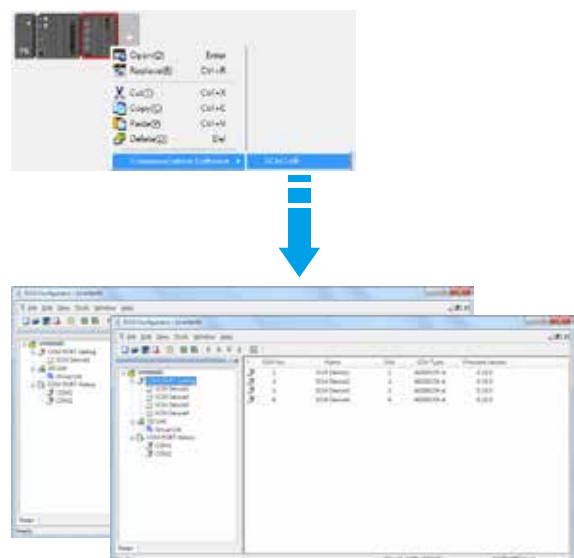

- **Parameter setting**  
Fast parameter setting on controller and modules without manual reference or programming

- **Module configuration method**

- **Smart module configuration**  
Supports an advanced planning tool for a variety of network modules

# Complete Diagnosis Tools for Quick and Effective System Monitoring

## Data Logger / Tracer

- Real-time
- Stable
- Precise

- Real-time monitoring:**  
High-speed tracer for fast sampling within 1 scanning cycle
- Stable logging:**  
Long-time data logger savings of up to 32,768 data records, which can be transferred to SD card
- Precise data capture:**  
Supports a variety of sampling intervals and trigger modes
- Convenient comparison:**  
Multiple data logs in various data formats can be recorded at the same time
- Efficient data analysis:**  
Supports trend display, scaling, arrangement, merge and measurement

## Real-time Module Monitoring

- Visualized monitoring**  
Direct monitoring interface provides real-time status on modules via LED indicators

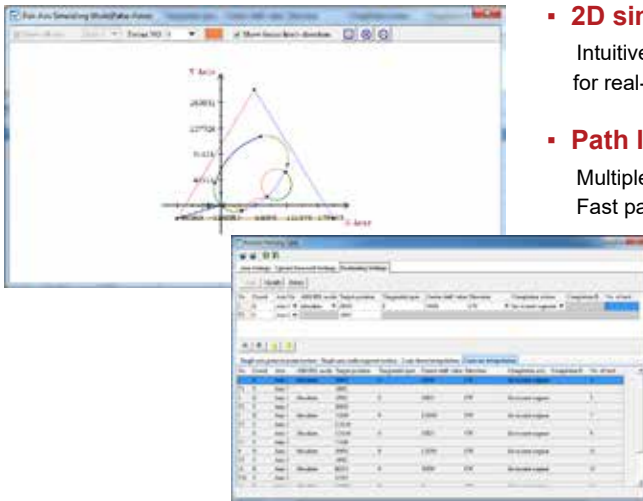

- Module comparison**  
Real-time inspection of actual module settings to ensure consistency

- Error logs**  
Immediate inquiry for error messages and logs of abnormal modules
- Module information**  
Provides model name and version of current modules

# Convenient Software Wizards for Effortless Planning

## Position planning table

- **2D simulation**

Intuitive 2D track simulation without complicated calculation for real-time path planning

- **Path list**

Multiple combinations for positioning modes and tracks  
Fast path planning via table-structured planning

- **Axis parameter setting**

Intuitive configuration interface for easy axis parameter setting without manual reference

- **High-speed counter setting tool**

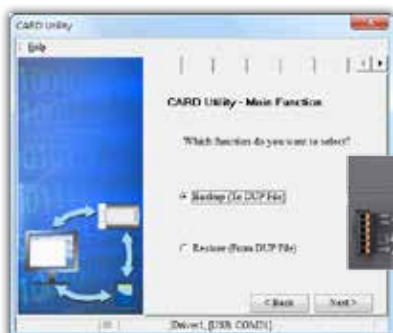

Counter index will display corresponding contact point, device and counter specification once the counting mode is chosen. Fast planning without manual reference for enhanced development efficiency.

### ▶ One-time setting

- **Data backup tool - CARD Utility**

Friendly guidance interface for easy data backup and restore on programs, parameters and devices

### Various backup and restore methods for flexible management and operation

Data backup to PC

Data backup to SD card

# Multiple Security Protection for Programs and Data

## Security: provides 6 types of program protection for data safety

- 16-digit password protection on main program
- 16-digit password protection on FBs
- Access denial mechanism on error login
- Data upload protection function
- Verification between Project (Programming ID) and CPU (PLC ID)

- Prevention of direct copy from IC

# Product Models and Specifications

## CPU Module

AS332T-A (NPN output)  
AS332P-A (PNP output)  
AS324MT-A (Differential-type)

Specifications	Program capacity 128k steps	Basic instruction 25 ns	I/O capability: 1,024 Expansion modules: 32		
	USB / RS-485 x 2 / EtherNet/IP	Micro SD Card	Function card x 2	CANopen remote I/O	
Built-in I/O	16DO / 16DI 12DO <sup>*1</sup> / 12DI <sup>*2</sup>	6 axes 200 kHz pulse output <sup>*1</sup>	6 channels 200 kHz high- speed counters <sup>*2</sup>	CANopen DS301 point-to-point positioning control	

\*1: AS324MT-A (differential type): 12DO (2 axes 4 MHz + 4 axes 200 kHz output)

\*2: AS324MT-A (differential type): 12DI (2 channels 4 MHz + 4 channels 200 kHz input)

### Power Supply AS-PS02

Input  
100 V<sub>AC</sub> ~ 240 V<sub>AC</sub>

24 V<sub>DC</sub>, 2A  
(for internal bus)

### Power Supply AS-PS02A

Input  
100 V<sub>AC</sub> ~ 240 V<sub>AC</sub>

24 V<sub>DC</sub>, 1.5A (for internal bus)  
24 V<sub>DC</sub>, 0.5A (for external I/O)

# Product Specifications

Model		AS332T-A	AS332P-A	AS324MT-A
Programming Languages		Ladder Diagram (LD), Structured Text (ST), Continuous Function Chart (CFC), Sequential Function Chart (SFC)		
Instruction Processing Speed	LD Instruction	25 ns		
	MOV Instruction	0.15 $\mu$ s		
	Elementary Arithmetic for Integer	0.92 $\mu$ s ~ 1.02 $\mu$ s		
	Elementary Arithmetic for Floating Point	1.69 ~ 1.85 $\mu$ s		
Program Capacity		128k steps		
Memory Capacity	Data (D)	64k words (30k user-defined, 30k software configuration and 4k special registers)		
	Extension (FR)	64k words (user parameter storage)		
Function Card No.		CPU supports 2 function cards		
Max. Extension Modules		32 (max. 16 analog modules / 4 communication modules)		
Max. Number of Inputs/Outputs		1,024 (input & output)		
CPU Built-in Inputs/Outputs		32		24
CPU Built-in Differential Inputs/Outputs		-		4 Input + 4 Output
Inputs/Outputs	X	1,024 inputs (X0.0 ~ X63.15)		
	Y	1,024 outputs (Y0.0 ~ Y63.15)		
Bit Devices	M	8,192 Bit (M0 ~ M8191)		
	S	2,048 Bit (S0 ~ S2047)		
Timer	T	512 (T0 ~ T511)		
16 bit Counter	C	512 (C0 ~ C511)		
32 bit Counter	HC	256 (HC0 ~ HC255)		
Pulse Output		NPN/PNP: 6 axes at 200 kHz		Differential type: 2 axes at 4 MHz 4 axes at 200 kHz, 2 channels at 4 MHz 4 channels at 200 kHz  NPN/PNP: 4 axes 200 kHz
High-Speed Counter		6 channels at 200 kHz		Differential type: 2 channels 4 MHz General: 4 channels 200 kHz
Data Backup (Without Battery)	Program	Flash ROM, 100,000 times rewritable		
	Latched Area	MRAM, no rewriting limit		
CANopen DS301	Connectable Salve Stations	Max. 64		
	PDO Data Capacity (Host)	Max. 2000 Bytes (Read & Write)		
	PDO Data Capacity (Slave)	Max. 8 PDO (Read & Write); Max. 8 Bytes for each PDO		
Real-time Clock (RTC)		General Lithium button battery (CR1620)		
Self-Diagnosis Function		CPU error, built-in memory error and more		
Rated Input Current	AS-PS02/ AS-PS02A	110 V <sub>AC</sub> ~ 240 V <sub>AC</sub> ( $\pm$ 10%)		
	CPU	24 V <sub>DC</sub> ( $\pm$ 10%)		
	Extension modules			

# Electrical and Environmental Specifications

Items		Specifications
Internal Power Consumption	CPU	150 mA
	Extension Module	Digital relay output <150 mA, Other modules < 80 mA
Operating Temperature		-20~60°C
Storage Temperature		-40~80°C
Operating Humidity		5~95%, non-condensing
Storage Humidity		5~95%, non-condensing
Vibration		IEC 61131-2, IEC 60068-2-6 (TEST Fc); 5 Hz ≤ f ≤ 8.4 Hz, constant amplitude 3.5 mm; 8.4 Hz ≤ f ≤ 150 Hz, constant acceleration 1g
Shock		IEC 61131-2, IEC 60068-2-27 (TEST Ea); 15g peak, 11 ms duration, half-sine
Operating Environment		Non-corrosive gas
Installation		Inside of the control panel
Pollution Degree		2
Protection Rating		IP20
Altitude		< 2,000 m

# Ethernet Specifications

Items		AS324MT-A / AS332T-A / AS332P-A	Note	
Protocols		MODBUS TCP, EtherNet/IP	Support the protocols at the same time	
MODBUS TCP	Equipment Type	Client / Server		
	Server / Client	32 / 32		
	RTU Mapping	4 sets		
Socket	TCP / UDP Links	4 TCP / 4 UDP		
EtherNet/IP	Equipment Type	Scanner / Adapter		
	CIP_IO Connection	CIP	32 (Client+Server)	
		TCP	16 (Client+Server)	
		Requested Packet Interval (RPI)	5 ms ~ 1000 ms	Preset: 20 ms
		Max. Performance	3000 pps	
	Max. Capacity/Connection	500 bytes		
	CIP_Explicit Message	Class 3 (Connected Type)	32 (Servers), shared with UCMM	Shared with I/O Connection
UCMM (Non-Connected Type)		32 (Clients + Servers), shared with Class 3	Shared with I/O Connection

# AS Series I/O Modules

## Digital I/O Modules (Input)

				Rated input voltage 5 ~ 24 V <sub>DC</sub>
<b>8 inputs</b>	<b>16 inputs</b>	<b>32 inputs</b>	<b>64 inputs</b>	Response time 1 ms
Faster wiring terminal block	Faster wiring terminal block	High-density MIL terminal block	High-density MIL terminal block	Filter function 1 ~ 20 ms
AS08AM10N-A	AS16AM10N-A	AS32AM10N-A	AS64AM10N-A	Screwless removable terminal block 8 / 16 inputs

## Digital I/O Modules (Output)

				NPN (Sink) or PNP (Source) module
<b>8 outputs</b>	<b>8 outputs</b>	<b>8 outputs</b>	<b>32 outputs</b>	Response time 1 ms (Transistor) 10 ms (Relay)
Faster wiring terminal block Transistor output NPN (Sink)	Faster wiring terminal block Relay output	Faster wiring terminal block Transistor output PNP (Source)	High-density MIL terminal block Transistor output NPN (Sink)	Screwless removable terminal block 8 / 16 outputs
AS08AN01T-A	AS08AN01R-A	AS08AN01P-A	AS32AN02T-A	

			
<b>16 outputs</b>	<b>16 outputs</b>	<b>16 outputs</b>	<b>64 outputs</b>
Faster wiring terminal block Transistor output NPN (Sink)	Faster wiring terminal block Relay output	Faster wiring terminal block Transistor output PNP (Source)	High-density MIL terminal block Transistor output NPN (Sink)
AS16AN01T-A	AS16AN01R-A	AS16AN01P-A	AS64AN02T-A

## ■ Digital I/O Modules (Mixed)

NPN (Sink) or PNP (Source) module	
Rated input voltage 5~24 V <sub>DC</sub>	Filter function 1~20 ms
Screwless removable terminal block	
Response time 1 ms (Transistor) 10 ms (Relay)	

16 inputs / outputs	16 inputs / outputs	16 inputs / outputs
Faster wiring terminal block 8 inputs / 8 transistor outputs NPN (Sink)	Faster wiring terminal block 8 inputs 8 relay outputs	Faster wiring terminal block 8 inputs / 8 transistor outputs PNP (Source)
AS16AP11T-A	AS16AP11R-A	AS16AP11P-A

## ■ Analog I/O Modules

4 channels	8 channels	8 channels	4 channels	6 channels
Analog input	Analog input	Analog input	Analog output	Analog input / output
AS04AD-A	AS08AD-B <b>New</b>	AS08AD-C <b>New</b>	AS04DA-A	AS06XA-A
Conversion time 2 ms / channel	50/60 Hz filter	A: Voltage and current B: Voltage C: Current	Resolution AI: 16-bit AO: 12-bit	
Accuracy ±0.2%	4/6/8 CH	Module monitoring / configuration	Differential inputs	

## ■ Load Cell Module

**2 channels**  
AS02LC-A

<b>Functions</b>	50/60 Hz filter	High-speed dynamic measurement	2 channels of independent sampling	
	Accuracy 0.4% full range	2 CH	Connectable to 4-wire / 6-wire load cell sensor	
<b>Software</b>	LCSofT	Filter function	Multiple-point calibration	Online monitoring / configuration

# AS Series I/O Modules

## ■ Temperature Measurement Modules

**4 channels**  
PT, NI temperature sensor  
AS04RTD-A

Conversion time 200 ms / channel		Resolution 0.1°C / 0.1°F	Wire breaking detection
Accuracy ±0.1%	50/60 Hz filter	Module monitoring / configuration	4 CH
Pt100 / Ni100 / Pt1000 / Ni1000 / JPt100 / LG-Ni1000 / Cu50 / Cu100, resistor 0~300Ω, 0~3,000Ω			

**4 channels**  
TC temperature sensor  
AS04TC-A

Conversion time 200 ms / channel		Resolution 0.1°C / 0.1°F	Disconnection detection
Accuracy ±0.1%	50/60 Hz filter	Module monitoring / configuration	4 CH
J, K, R, S, T, E, N, B type thermocouple; ±100 mV			

## ■ Communication Modules

**2 COM ports**  
AS00SCM-A

<b>COM port</b>	RS-232C	RS-422	RS-485	CANopen
<b>Function</b>	Selectable COM ports; supporting standard MODBUS protocol and user-defined protocol			Delta communication protocol
<b>Software</b>	SCMSoft	Data exchange table for quick setup		Real-time monitoring on communication status
